A Word About Our Gardens

We are located at LaPorte, Indiana, which is 60 miles east of Chicago, on the New York Central Railroad and the Lincoln Highway. Visitors will find us easily and will always be welcome.

We have some ten acres planted to Peonies, Irises, Hardy Flowers and Ornamental Nursery Stock.

Our climate is rather severe, for the summers are generally very hot, while the winters are usually a mixture of sub-zero weather followed by short periods of warm, thawing weather. The sudden changes in temperatures are such that only the most hardy and vigorous plants can survive and therefore the stock which we offer for sale is absolutely dependable.

Our blooming season varies in date from year to year, but Irises are at their best about the last week in May and these are followed by the Peonies which are at their best for about three weeks. Visitors will find a trip to our gardens in the blooming season a rare treat, and one which will help materially in selecting varieties. We are never too busy to show our friends around and to answer questions cheerfully. If you can not come to see us, write us about your wants.

AMERICAN PEONY SOCIETY
AMERICAN IRIS SOCIETY
AMERICAN ASSOCIATION OF NURSERYMEN

We want everyone who loves flowers to know about our Irises, Peonies and other perennials. If you will send us ten or more addresses of people who are interested in beautifying their homes, we will send you an iris root worth \$1.00 or more with your next order.

Irises

Irises are frequently referred to as the "Rainbow Flowers," because of their wide range of color. As delicate in form and in color harmony as the orchid, they are, however, quite easily grown and are perfectly hardy.

They require a dry, sunny location, where the soil is at all times well drained. A wet soil will cause the root to decay, as will standing water in the winter. Plant them with the rhizome barely covered and the rootlets well spread out, then firm the earth well around them. If the soil is dry when planting, put water in the hole or trench but do not water again until growth has started. Never allow manure to come into contact with the rhizome; if a fertilizer is required, crushed limestone, hardwood ashes or bone meal in small quantities may be stirred in around the roots, at the same time being careful not to touch the leaves with it. Drought after the blooming season is beneficial as that is the dormant season when transplantings can be made most successfully.

Irises can be transplanted with success in our climate at any time of the year when the soil is not frozen, providing the leaves are cut back and we will ship accordingly, although we prefer to ship in July and August when most of our own transplanting is being done.

PRICES-Prices quoted are for one rhizome, which under usual conditions should bloom the following spring,

We advise placing your order early, as the stock of the newer and rare varieties is limited.

NOTE—In compiling the following list, all names have been checked and arranged according to 'Stanardized Plant Names' issued in December 1923 by the American Joint Committee of Horticultural Nomenclature.

Abbreviations used are:

S.—Standards.

F.-Falls.

T. B.—Tall Bearded.
I. B.—Intermediate Bearded.

M. B.-Miscl. Bearded.

Hex.-Hexagona.

The number which precedes the names of many of the irises, is the rating of the American Iris Society. These ratings are the result of a vote taken by the members in regard to the value of a variety as compared with a theoretically perfect plant and blossom which would rate 100. The votes were averaged and as the ratings stand, they are now the only official means of classifying a flower. Some which have low ratings we will continue to grow because, with us, they are of distinct value, but in a general way the amateur can well follow the ratings.

To those who do not know of the American Iris Society and the valuable work it is doing, we would recommend taking out a membership. The publications of the society are full of valuable and interesting information and well worth the small yearly dues. Those interested may write Mr. R. S. Sturtevant, Wellesley Farms, Mass., the secretary of the society.

CHRISTMAS CACTUS

This old-fashioned house-plant always blooms for us at Christmas. We set the pots in the ground in a sunny place for the summer, take them inside and place in a south window, and they always show buds by Thanksgiving. As they are plants from the desert, they do not want much water but do like the hot sun. Small plants that should bloom next Christmas, 35c each.

1926 Peony Price List

We are including our price list of Peonies in this catalogue because our old customers have had our descriptive list. We will gladly send it to anyone who has not had it or who has lost it, if they will ask us for it.

This is our latest price list and one of which we are proud as it is a better one than ever before. The varieties listed have all been rigidly tested and for several reasons we can unhesitatingly recommend each peony listed. They have all been good growers and bloomers for us and we know that they will do well in any good soil, with ordinary cultivation.

The prices quoted are in each case for strong three to five eye divisions or equivalent one year roots. This is the size which we like to plant ourselves, and which we believe will give surest and best results. In some cases where the varieties are listed at five dollars or more, we will furnish smaller roots for one-half the regular price, such smaller roots to have two good "eyes" on a well balanced root.

All roots are guaranteed to be true to name, from healthy stock which has bloomed and been checked carefully by us. Occasionally a mistake may occur in digging and labeling and if such a case should happen we will replace the plant or return the money paid.

Orders are filled as soon after the first of September as growing conditions permit, exactly in the order in which they are received and as the quantity of some of the choicer varieties is limited we advise placing your order early.

TERMS

Our terms are cash with the order, and we will promptly return the money for any varieties of which we have sold out. We will not substitute.

These prices include free packing, but shipments will be sent by express on which the purchaser pays the charges unless we are requested to send by parcel post. If customers prefer the package sent by parcel post, please send ten cents additional for each root or division and we will pay the postage and insure the safe delivery of the package.

NOTE—Many varieties are described in our catalogue which are not listed for sale this year. Should any of these be desired ask about them.
